Keeping your research on track

F Fisher
Scientific

Fisher Scientific's trusted, well established and proprietary product range, Fisherbrand is committed to providing quality products at affordable prices. Fisherbrand offers a broad selection of laboratory supplies and consumables covering a diverse range of applications such as chromatography, liquid handling, electrophoresis, pH and electrochemistry. It's the smart way to achieve cost savings over branded products without having to compromise on quality.

In addition to the extensive Fisherbrand range, Fisher Scientific is your partner of choice for chemicals and bioreagents. Fisher Chemical and Fisher Bioreagents deliver convenience, quality and consistency and are the leading provider of chemicals and bioreagents to many research sectors, such as academia, pharmaceuticals, biotechnology and healthcare.

- Fisher Chemical offers more than 4,000 chemicals of the highest quality, including 'dry' reagents, ready made solutions and high purity solvents. All chemicals are ISO 9001:2008 certified and undergo rigorous quality assurance and testing procedures, ensuring excellent lot-to-lot and bottle-to-bottle consistency. Supported by a clear and simple grade and application structure, choosing the product that best suits your requirements is easy.
- Fisher Bioreagents offers over 1,000 products dedicated to molecular biology research, biochemistry and cellular biology. It is your single source for high purity products

INTRODUCTION TO TRACEABLE™ PRODUCTS

Fisherbrand Traceable™ products include timers, stopwatches, clocks, data-logging thermometers, bench thermometers, differential thermometers, printing thermometers, humidity meters, monitoring/alarm humidity meters, barometers, conductivity meters, conductivity standards, one-shot conductivity standards, as well as a range of everyday measurement lab tools.

All of these Traceable™ products are provided with a Traceable™ Calibration Certificate from an ISO 17025 calibration laboratory (refer to 'Sample Traceable™ Certificate' on the opposite page). Thermometer, timer, and humidity certificates are accredited by the American Association for Laboratory Accreditation (A2LA). The ISO 17025 calibration certificate, that comes as standard with the units, is recognised in all European countries.

The supplied Traceable™ Certificate indicates that the product is traceable to standards provided by the National Institute of Standards and Technology (NIST), a U.S. Government agency within the Commerce Department. The Traceable™ Certificate complies with ANSI/ NCSL Z540-1.

The Traceable™ Certificate includes all of the information to meet today's stringent accreditation demands, government specifications, and ISO 9000 requirements. This information includes serial number, certificate number, model number, calibration test equipment, equipment serial number, equipment calibration due date, NIST test number, unit accuracy, uncertainty, unit test conditions, test points, individual unit's specific test date, unit's next calibration due date, tester's name, and signature of the metrology manager.

Each Traceable™ product is individually serialised, calibrated and certified. An individually serialised Traceable™ Calibration Certificate provides you with the assurance that an independent auditor has checked the methods, procedures, testing, technique, and record-keeping practices of the calibration testing laboratory. The American Association for Laboratory Accreditation (A2LA) is widely recognised internationally through bilateral and multilateral agreements and through its participation in International Laboratory Accreditation (ILAC) and Multilateral Recognition Agreement (MRA). Through A2LA Accreditation, Traceable™ Certificates are internationally recognised by Accreditation Agencies and Services in over 75 countries throughout Europe, the Middle East, North America, South America, Asia, and Africa. There is no need to have the units calibrated locally before use as all European governing bodies fully accept and recognise the Traceable™ Certificate of Calibration.

Finally, all products are produced under ISO 9001, certified by DNV (Det Norske Veritas), and supplied by an ISO 9001 Quality Certified Company. This quality certification provides you with the assurance that you will receive only the finest and most reliable products. ISO 9001 Certification is a worldwide recognition of the highest possible quality for innovative electronic products and ensures that every item is checked and rechecked for superb laboratory performance time after time.

This section provides an overview of the comprehensive range of Fisherbrand Traceable™ products (pages 8 to 40). As already described these products are manufactured to the highest standards and undergo rigorous quality assurance and testing procedures to ensure that they deliver on our promise of quality, reliability and value. Additional complementary products from the Fisher Scientific Family are featured within separate sections, 'Fisher Chemical' (pages 43 to 45) and 'Fisherbrand Supplement' (pages 46 to 73). Whilst these products are not part of the Traceable™ range, they continue to demonstrate that Fisher Scientific is continually going that extra mile to deliver you essential products for your everyday laboratory needs.

A Traceable™ Certificate assures complete testing and accreditation of your chosen product

Accredited by A2LA (The American Association for Laboratory Accreditation) dedicated to "one test accepted everywhere, one accreditation accepted everywhere". A2LA is your assurance of internationally recognised technical laboratory competence

A2LA is recognised by ILAC and MRA.

Displays catalogue number for complete product reference

Itemises the test equipment used for calibration

Reports environmental conditions at the time of measurement

Spells out test uncertainty ratio and confidence level

Lists specific conditions that may affect product accuracy

Supplied from an ISO 9001 quality facility certified by DNV

Conforms to universally recognised ISO 17025 Standard, a requirement for any ISO 9000 quality facility

Establishes with reference numbers the unbroken chain of traceability to NIST

Displays serial number for total product identification

Spells out test uncertainty ratio and confidence level

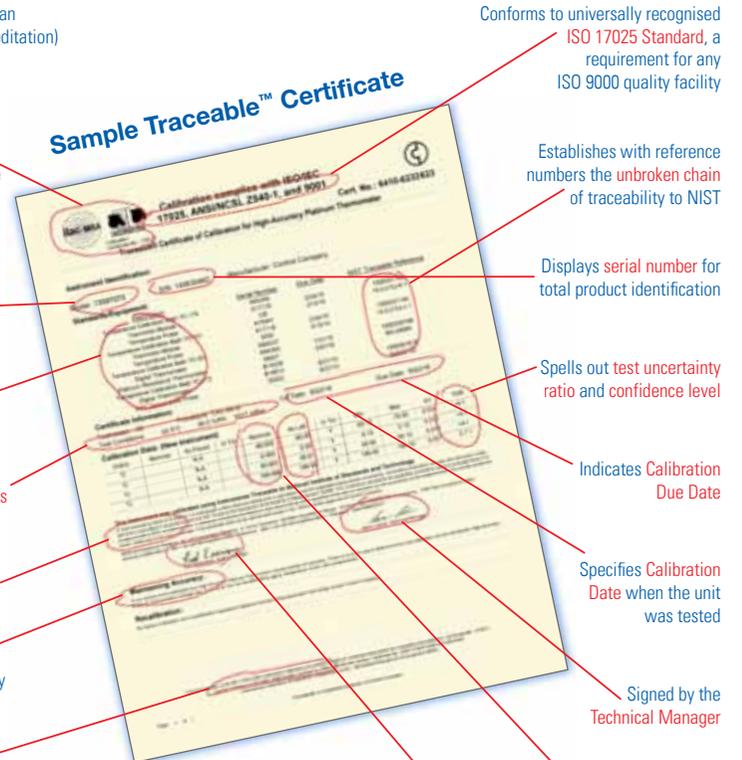

Indicates Calibration Due Date

Specifies Calibration Date when the unit was tested

TRACEABLE™ TIMERS, STOPWATCHES AND CLOCKS

Timers and stopwatches are essential instruments for the accurate measurement of time interval in many laboratory procedures, a time interval being defined as the time elapsed between two events. The standard unit of time is the second (s), although many procedures require measurement over longer periods such as minutes, hours or even days, or conversely in fractions of a second such as milliseconds (ms) or microseconds (µs). The second is one of the seven base units in the International System of Units (SI), the metric scheme that is the world's most widely used system of measurement. Other SI base units include Kelvin (temperature), meter (length), kilogram (mass), candela (luminous intensity), mole (amount of substance) and ampere (electric current).

Traceable™ Timers

The comprehensive selection of Fisherbrand Traceable timers have been designed to meet the broad range of requirements for accurate and reliable time measurement in the laboratory. No test is too long or too short for our Traceable™ Timers as they can accurately count down from up to 100 hours with accuracies down to an incredible value of 0.001%. Many accessories included as standard make them perfect for the researcher 'on the go' and with the option of having your Traceable™ Timer alarm producing attention-grabbing sounds of up to 100 decibels or else set to 'silent' mode but with bright LED indicators you will never miss another alarm again.

Fisher Scientific's top selling Traceable™ Timers include:

- The Four-Channel Alarm Timer (Cat. No 11745863) which features four different independent timing channels (refer to page 9)
- The Multi-Coloured™ Timer (Cat. No 11784426) which is supplied with three distinct, colourful frames that can be changed for identification purposes if required or for simply adding a bit of colour to the lab (refer to page 9)
- The Extra, Extra Large Digit Timer (Cat. No 15204016) which is ideal for viewing at a great distance (refer to page 11)

All Fisherbrand Traceable™ timers are individually certified ensuring that it has been properly calibrated, and if used correctly, will produce valid and accurate results. To guide you to choosing the right timer for your particular application, please refer to the selection guide below.

Traceable™ Timers, Four-Channel

Traceable™ Four-Channel Alarm Timer

The lab's most popular timer

- Features: count up/down, time in/out, memories, alarm, 12/24 hour clock
- Large high display allows viewing from a distance
- Remarkable memory returns display to previously programmed countdown time at the touch of a button
- Extra-loud, high decibel alarms for 1 minute or can be silenced manually
- Timing capacity: 99 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with clip, stand, magnet, battery, Traceable™ Certificate

Cat. No	Description

11784426	Traceable™ Multi-Coloured™ Timer

Traceable™ Timers, Three-Channel

Traceable™ Three-Channel Alarm Timer

Innovative timer has programmable alarm with adjustable volume control for any environment

- Features: count up/down, time in/out, memories, alarm, clock, adjustable alarm duration/volume
- Perfect timer to dedicate to repetitive tests
- Triple display shows three different times at once; tests can be started individually or simultaneously
- Adjustable volume alarm can be set to sound for 60 seconds or to sound continuously until turned off
- Timing capacity: 99 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with battery, Traceable™ Certificate

Cat. No	Description
11725863	Traceable™ Three-Channel Alarm Timer

Traceable™ Triple-Display Timer

Triple-line display makes easy work of simultaneously timing three events

- Features: count up/down, time in/out, memory, alarm, stopwatch, 12/24-hour clock
- Perfect timer for dedicating to a test requiring several independent time measurements
- Unique memory returns channel to previously programmed setting at touch of a key
- When zero is reached, distinct alarm sounds and timer counts up showing time elapsed since alarm
- Timing capacity: 19 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with battery, magnetic back, Traceable™ Certificate

Cat. No	Description
11705873	Traceable™ Triple-Display Timer

Traceable™ Timers, Two-Channel

Traceable™ Three-Line Alarm

Unique, three-channel timer is perfect for use in all count up/down timing combinations

- Features: clock, count up/down, alarm, stopwatch, memory
- Displays three different countdown times simultaneously
- Three unique channels may be started individually or concurrently
- Memories return the display to the previously programmed time
- Perfect timer to dedicate to a group of repetitive tests
- Alarm: sounds at zero, "Time's Up" is replayed, timer begins counting up
- Chemical-resistant ABS plastic case, magnetic back, flip open easel
- Timing capacity: 99 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with clip, stand, magnet, battery, Traceable™ Certificate

Traceable™ Flashing LED Big-Digit Dual Channel Timer

Compact, multi-tasker with six-digit, dual channel display

- Features: two simultaneous countdown channels, flashing LED timing indicator/alarm, adjustable volume
- Unique visual indication for each channel; green light flashes while counting down and red light flashes once zero has been reached
- Adjustable volume: high decibel, low decibel, or off for silent flashing LED operation
- Timing capacity: 99 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with batteries, magnetic back, flip-open stand/clip, opening for lanyard, Traceable™ Certificate

Traceable™ Instant-Recall Memory Timer

Always-ready timer delivers accurate results for lab's demanding countdown requirements

- Features: count down, time in/out, alarm, memory
- Intuitive, three-key programming makes this an all-time favourite for delivering countdown results
- Input a time and the instant memory always returns the display to the programmed time
- Extra-large, 16 mm-high digits
- Timing capacity: 99 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with battery, Traceable™ Certificate

Cat. No	Description
11775873	Traceable™ Instant-Recall Memory Timer

Traceable™ 99m/59s Timer

Jumbo-digit, light weight portable lab partner is ideal for repetitive countdown tests

- Features: count up/down, memory, large keys, extra large digits, alarm
- Four-digit LCD 19mm high display shows the time remaining in minutes and seconds
- Automatic memory resets display to last programmed time, ideal for repetitive tests
- High volume alarm sounds at zero for 30s
- Timing capacity: 99 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with battery, magnet, flip-open stand, clip, Traceable™ Certificate

Cat. No	Description
11799795	Traceable™ 99M/59S Timer

Traceable™ Alarm Timer/Stopwatch

Numbered, quick-set keys make programming this multi-purpose timer a breeze

- Features: count up/down, time-out, alarm
- Numbered keys make it a breeze to set countdown time
- Timing capacity: 99 minutes, 99 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with clip, stand, magnet, opening for lanyard, battery, Traceable™ Certificate

Traceable™ QC timer

Simple three-key use and large digits for easy viewing

- Features: count up/down, alarm
- Easy three key operation
- Times set up to 20hr in 1min increments
- At zero 1min alarm sounds
- Very large 19mm LED digits
- Timing capacity: 19 hours, 59 seconds
- Resolution: 1 min
- Accuracy: 0.01%
- Supplied with battery, flip-open stand, magnet, Traceable™ Certificate

Cat. No	Description
11715873	Traceable™ QC timer

Traceable™ Fingertip Timer

Quick-to-program, three-key, countdown timer delivers error-free operation for any lab test

- Features: count down, time in/out, alarm
- Impressive memory, remembers most recently programmed setting for recurring lab experiments
- Supplied with battery, magnetic back, Velcro™, Traceable™ Certificate
- Timing capacity: 99 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%

Cat. No	Description
11745873	Traceable™ Fingertip Timer

Traceable™ Clip-It™ Timer

Perennial favourite multi-tasking timer with handy attachment clip

- Features: count up/down, alarm, time in/out
- Memory saves last programmed setting for quick recall - useful for repetitive timing events
- Timing capacity: 99 hours, 59 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.005% quartz-crystal
- Supplied with clip, magnet, opening for lanyard, battery, Traceable™ Certificate

Cat. No	Description
11765873	Traceable™ Clip-It™ Timer

Traceable™ Water-Resistant, Flashing Timer

Splash-proof, water-resistant timer is ideal for wet labs, wash-down areas, plants, and field use

- Features: water-resistant, splash-proof, count up/down, alarm, lanyard
- When zero is reached a bright red LED flashes and an audible alarm sounds for one minute or until manually turned off
- Timing capacity: 99 minutes, 59 seconds
- Resolution: 1 second
- Accuracy: 0.01%
- Supplied with lanyard, suction cup, magnet, and Velcro™, battery, Traceable™ Certificate

Timing Functions

A Single Action Timing: Pressing start key begins timing, a second press stops clock. Time-out/Time-in: Records total elapsed

C display. When maximum display is reached, digits rollover to zero and automatically begin timing again. Permits timing for hours, days, or weeks.

B time with any number of "time-outs". Permits stopping timer for "off" periods, holds reading where stopped, and starts again from that point. Continuous Timing: Digits offer a continuous

D Cumulative Split: Freezes display for partial event times while internal clock continues to run and measure total elapsed time since starting timer.

Traceable™ Big-Digit Stopwatch/Chronograph

Utility unit has complete stopwatch functions and full chronograph features

- Features: big-digit, chronograph, time in hours, minutes, seconds, AM/PM, date, day, time alarm
- Stopwatch functions: single action, time in/out, cumulative split, continuous timing
- Extra-tough ABS plastic shockproof construction makes it ideal for lab and plant use
- Timing capacity: 23 hours, 59 minutes, 59 seconds
- Resolution: 0.01 second
- Accuracy: 0.0035%
- Timing functions: A, B, C, D
- Supplied with battery, lanyard, Traceable™ Certificate

Traceable™ Water-Resistant/Shockproof Stopwatch

General purpose stopwatch is water-resistant to three atmospheres

- Features: water-resistant, chronograph, time of day in hours, minutes, and seconds, date, day, and alarm
- Stopwatch functions: single action, time out, cumulative split, interval split, continuous timing
- Timing capacity: 23 hours, 59 minutes, 59 seconds
- Resolution: 1/100 of a second (between 0 to 30 minutes), 1 second (between 31 min to 23 hr 59 min 59 sec)
- Accuracy: 0.01%
- Timing functions: A, B, C, D
- Supplied with battery, key-chain, Traceable™ Certificate

Traceable™ Three-Key Stopwatch

The first disposable stopwatch

- Features: single action, time out, cumulative split, and continuous rollover timing
- Displays time and date
- Timing capacity: 23 hours, 59 minutes, 59 seconds
- Resolution: 1/100 of a second (between 0 to 30 minutes), 1 second (between 31 min to 23 hr 59 min 59 sec)
- Accuracy: 0.1%
- Timing functions: A, B, C, D
- Supplied with battery, lanyard, Traceable™ Certificate

Traceable™ 60-Memory Stopwatch

Extra smart 10-hour time keeper recalls 60 events

- Features: 60 memories, alarm, time, date, day of week
- Automatic repeat with countdown alarm timing
- Three line display, times to 10hr
- Multifunction stopwatch, 60 memories recall all splits
- Timing capacity: 9 hours, 59 minutes, 59 seconds
- Resolution: 0.01s
- Accuracy: 0.001%
- Timing functions: A, B, C, D
- Supplied with battery, lanyard, Traceable™ Certificate

Traceable™ Clocks

Fisherbrand Traceable™ Clocks are the ideal, static time-keeper for any lab, office, or work environment. Many of the Traceable™ Clocks can be hung on the wall and will keep you informed of the ambient temperature, humidity, and, of course, time.

Traceable Clocks are available in digital, atomic digital, or conventional analogue formats.

- **Traceable™ Analogue Clocks** clearly display the time with bright, sweeping hands. To assure accuracy an individually serial-numbered Traceable™ Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability, for time only, to standards provided by NIST (National Institute of Standards and Technology).

- **Traceable™ Atomic Clocks** are accurate to 1/10,000 of a second. Resolution is 1 second. Receives a radio signal from the atomic clocks in Anthon, United Kingdom and Mainflingen in Hessen, Germany, providing you with the exact time accredited to national standards.

TRACEABLE™ THERMOMETERS AND TEMPERATURE DATA-LOGGERS

Traceable™ Thermometers

Fisherbrand offers a wide range of Traceable™ Thermometers, providing accurate results in all temperature conditions and environments and suitable for use with liquids, air, gases, and semi-solids.

Traceable™ Thermometers are available as fully portable models or are supplied as standard with accessories for secure placement in any location. Traceable™ Thermometers also offer Minimum/Maximum memories and also feature visual LED alarms or audible alarms suitable for both quiet and loud working environments. So whether you are interested in simply monitoring the environmental laboratory conditions and recording the ambient temperature or monitoring your precious samples in refrigerators and freezers, Fisherbrand has the perfect product to suit your requirements.

The Traceable™ Refrigerator/Freezer Thermometer (Cat. No. 11873460, refer to page 20) is the most widely recognised and most popular choice in the laboratory for monitoring refrigerator temperatures. It displays the current temperature, plus the maxima and minima, and can also be set with high or low alarms.

For increased resolution and accuracy, the High-Accuracy Refrigerator Thermometer (Cat. No. 11725853, refer to page 20) is the thermometer of choice. This thermometer has a resolution of 0.01°C and an accuracy of $\pm 0.3^\circ\text{C}$. Additionally, it provides a time/date stamp of when the minimum and maximum temperatures were achieved or when an alarm was triggered.

In addition to the Traceable™ Thermometers highlighted above, the range also includes many other specialty types, including those with robust platinum or stainless probes, or those operating via infrared detection or via Type K thermocoupling.

Traceable™ Refrigerator/Freezer Thermometers

All Fisherbrand Traceable™ Refrigerator/Freezer Thermometers are individually certified ensuring that the thermometer has been properly calibrated to give trusted results. To guide you to choosing the right thermometer for your particular application, please refer to the selection guide below.

Traceable™ High-Accuracy Refrigerator/Freezer Thermometer

High accuracy thermometers can monitor two different areas of any refrigerator or freezer

- Reads to 0.01° while monitoring temperatures in refrigerator and freezer simultaneously or two refrigerator locations, °C/°F switchable
- Visual and audible signals continue even if temperature returns to non-alarm range
- Triple display shows minimum, maximum and current temperatures
- Two channel alarms provide unique visual (LED's) and audio alerts when temperature rises above or falls below user-defined high and low set points
- Unit displays the exact time and date when dual thermometer alarms are triggered, alarms are programmable in 0.1° increments
- Monitors minimum and maximum readings and displays the exact time and date when minimum and maximum temperatures occurred for both probes
- Supplied with battery, 3m cable, magnetic strips, Velcro™, bench stand, Traceable™ Certificate

Traceable™ Refrigerator/Freezer Thermometer

The world's most popular refrigerator/freezer thermometers

- Triple display simultaneously shows MIN/MAX and current temperatures, °C/°F switchable
- Accurately monitor temperatures in freezers, water baths, heating blocks, incubators and refrigerators with this enclosed temperature-buffered sensor
- Bottle insulates sensor from rapid temperature changes when refrigerator door is opened
- Minimum/maximum monitors high and low readings overnight, on weekends, or for any time period
- Alarm is programmable in 1° increments, sounds continuously when temperature rises above/falls below set points and can be turned off manually
- Visual and audible signals continue even if temperature returns to non-alarm range
- High-impact, chemical-resistant ABS plastic case: 70mm x 108mm x 19mm, weight 113g

Traceable™ Wireless Radio-Signal Refrigerator Thermometer

Captures temperature data with high-efficiency wireless technology

- Unit wirelessly reads refrigerator temperatures from 30m away, place remote module inside a refrigerator
- MIN/MAX memory allows monitoring conditions over any time period, °C/°F switchable
- Distinctive alarm sounds when temperature rises above or falls below set points
- Indicator on main unit shows rising/falling temperature trends
- Readings from up to three remote sensors are sent to main unit via radio signal -433 MHz penetrates refrigerators and walls
- Supplied with batteries, one main unit, one remote unit, flip-open stand, wall mount, Velcro™, Traceable™ Certificate

Traceable™ Thermometers, Platinum

Traceable™ Platinum Ultra-Accurate Digital Thermometer

Most accurate thermometer available with 0.0001° resolution

- Instant response probe updates readings three times per second for liquids, air/gas and semi-solids
- Computer output data captures in real time
- Decimal-placement key changes display to show 1, 2, 3 or 4 significant numbers after decimal
- Internal data logger automatically captures MIN/MAX readings every hour for last 24 hours
- Supplied with battery, platinum probe, cable, computer output, plastic carrying case, Traceable™ Certificate

Traceable™ Digital Thermometer

The laboratory standard

- Triple purpose stainless steel probe for liquids, air/gas and semi-solids
- Ideal for food, pharmaceuticals, petroleum products, gas systems, soil, ovens and more
- Unit reads in °C and °F and includes a HOLD key for freezing data on the display for future readings
- Instant HISTORY key recalls minimum and maximum readings over the past 24 hours
- Units conforms to ITS-90 International Temperature Standard
- Supplied with battery, probe, cable, computer output, plastic carrying case, Traceable™ Certificate

Traceable™ Platinum High-Accuracy Freezer Thermometer

Displays MIN/MAX temperatures for previous 24 hours (for each hour) and previous seven days (for each day); or previous 31 days (for each day)

- 13507080 is ideal for ultra-low freezer applications
- 13577070 and 13567070 are ideal for refrigerator/freezer applications
- Triple display shows current temperature in °C or °F, as well as the MIN/MAX temperatures
- Time/date stamp key shows exact time and date for all minimum and maximum readings
- Visual LED flashes and audible alarm sounds continuously even if temperature returns to non-alarm range
- Supplied with platinum probe, stand, wall mount, probe holder, batteries, Traceable™ Certificate

Traceable™ RTD Platinum Thermometer

State of the art aerospace technology delivers high platinum performance

- High-precision thermometer is geared specifically for measuring temperatures in soils, foods, oven, cuvettes, gas systems, water baths, wastewater, incubators, chemical solutions and extremely cold conditions
- Fail-safe display shows low battery and probe conditions
- Computer output allows thermometer to be connected to a computer or data logger for capturing and storing results
- One-key condition allows everyone in the lab to report identical readings and eliminates operator error techniques
- Supplied with platinum RTD probe, battery, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy	Probe
11729765	-50 to 400°C (-58 to 752°F)	0.01° below 200°C, 0.1° above 200°C	±0.1% + 0.2°C below 200°C and ±0.15% + 0.5°C above 200°C	152mm probe, 3.3mm diameter, 1m cable length

Traceable™ -100°C Platinum Freezer Thermometer

Fast-response RTD platinum probe with thin micro cable supplies high-precision results

- Accurate -100°C platinum probe is triple purpose for liquids, gas/air and frozen materials
- Ultra-slim micro 3m cable allows freezer doors to seal tightly around it
- One-key condition allows everyone in the lab to report identical readings and eliminates operator error techniques
- Supplied with platinum RTD probe, battery, Traceable™ Certificate

Traceable Thermometers with Stainless Steel Probes

Traceable™ Kangaroo™ Thermometer

Pocket-size thermometer features handy cable storage and probe brackets for portability

- Precision memory feature automatically captures and recalls minimum/maximum temperature readings over any time period, °C or °F switchable
- Efficient alarm continues to sound every minute until temperature returns to non-alarm conditions
- Supplied with battery, probe, cable, flip-open stand, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy	Probe
11799725	-50 to 300°C (-58 to 572°F)	0.1° from -19.9 to 199.9°C; or 1° elsewhere	±1°C from -30 to 250°C; or ±2°C elsewhere	190mm length 3.5mm diameter

Traceable™ Mini-Thermometer

Simple three-key thermometer is business-card sized for easy storing and handling

- Stainless steel probe can be used to measure liquid, air/gas, or semi-solids
- Small but powerful unit fits easily into tool kits, briefcases or pockets
- Supplied with battery, probe, cable, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy	Probe
11749725	-50 to 150°C (-58 to 302°F)	0.1°	±1.0°C	3.5mm diameter, 178mm length, 457mm cable

Traceable™ Digital Thermometer

Ideal for use in cuvettes, foods, soils, water baths, waste water and incubators

- Countdown timer, programmable Hi/Lo alarms, MIN/MAX memory, °C or °F switchable
- High/low alarms may be programmed in 1° increments, alarm mode may be switched off when not required
- Unit features a countdown timer for 99 hrs, 59 mins to 1 min and may be set in 1-minute intervals
- Supplied with battery, probe, cable, probe holder, flip-open stand, Traceable™ Certificate

Traceable™ Waterproof Thermometer °C/°F

All-weather compatible

- Water/shockproof case provides flawless readings in freezers, water baths, incubators and tanks
- One-key operation quickly recalls highest/lowest readings over any time period
- Easy view, 6.4 mm high LCD digits may be read with a glance
- Supplied with battery, probe, cable, suction cups, magnet, Velcro™ strips, Traceable™ Certificate

Traceable™ Long-Stem Thermometer

Ideal for replacing all glass and mercury thermometers in the lab

- On/off switch provides longer battery life, °C/°F switchable range
- Long stem allows for taking readings while stirring and is ideal for use in incubators and ovens
- Supplied with battery, protective sleeve, Traceable™ Certificate

Traceable™ Waterproof Food HACCP Thermometer

Versatile, no-touch infrared and piercing probe combo create perfect HACCP thermometer

- Designed specifically as a HACCP (Hazard Analysis and Critical Control Point) thermometer for food safety
- LED's indicate the HACCP zones: green light under 4°C (40°F), green light over 60°C (140°F) and red danger light between 4 to 60°C (40 to 140°F)
- Display shows current, MIN/MAX temperature, low battery and emissivity value for infrared
- Waterproof case and unique membrane keys prevent splashes/spills from permeating unit
- Infrared emissivity: 0.95 default; adjustable from 0.1 to 1.0; field of view: 2.5:1
- Supplied with battery, probe, Velcro™, Traceable™ Certificate

Traceable™ Printing Thermometer

Printing thermometer provides permanent record, prints time and date

- Provides permanent record of temperature and time of day/date/month
- Prints the time and date for maximum only, minimum only, average only, and in circularly mode T1, T2 and differential
- Automatic printing may be programmed to print in any interval from 3 seconds to 23 hours 59 minutes 59 seconds
- Dual probe inputs allow displaying temperature of probe 1, probe 2, or difference (delta) of probe 1 and 2 (accepts Type J, K, T or E probe), °C/°F switchable
- Supplied with two 1.2m Type K beaded probes, two thermal paper rolls, ABS carrying case, Traceable™ Certificate

11779775	-200 to 1,333°C (-328 to 2,431°F)	0.1°	±1°C

Traceable™ Disposable Temperature Recorder

Provides a permanent records – easy to read, fax or scan

- Monitors refrigerators, supply rooms, food storage, chemical warehouses, animal quarters, incubators, goods-in-transit, walk-in chambers, biological materials, and manufacturing plants
- Single use, disposable recorder displays temperatures on a 0.9mm strip chart
- Records for 10 or 40 days
- Temperature range -28 to 38°C and -20 to 100°F
- Accuracy is ±1°C (±2°F)
- Solid state, battery-driven, quartz-crystal controlled motor turns the chart with an accuracy of better than 1 second per day
- Temperature sensor is bimetallic
- Shows temperature and time/day of occurrence
- A tamper evident seal maintains the integrity of unit and results
- Recorded chart remains inside unit until seal is broken
- Four-part form on the front permits writing start-time, date, location, and other pertinent information
- The instrument, chart, four-part form, and Traceable™ Certificate are all marked with the same serial number
- Dimensions and Weight: 133 x 97 x 64mm, 284g
- Supplied with battery, chart paper, Traceable™ Certificate

Cat. No	Description
11709795	Traceable™ Disposable Temperature Strip-Chart Recorder, 10 Days
11719795	Traceable™ Disposable Temperature Strip-Chart Recorder, 40 Days

Traceable™ Big-Digit Memory Thermometer

View ambient and probe temperatures from 7m

- Dual display permits reading ambient and probe temperatures simultaneously, °C/°F switchable
- MIN/MAX memory readings may be displayed and reset at the touch of a key
- Cable and sensor perform accurately when underwater, always-on instrument reads temperature constantly
- Supplied with flip-open stand, wall mounting, battery, 3m cable, Velcro™, Traceable™ Certificate

11759755	-50 to 70°C (-58 to 158°F)	-5 to 50°C (23 to 122°F)	0.1°	±1°C

Traceable™ Thermometers, Type K

Traceable™ Total-Range Thermometer

Water-resistant design is perfect for use in lab or plant's worst environments

- Unit can recall minimum and maximum temperature readings captured during any time; updates display twice a second
- HI/LO Alarm: indicates when temperature rises above or falls below high/low set points, 1° increments, °C/°F switchable
- Timer feature displays duration of temperature conditions and time tests; capacity: 23 hours 59 minutes to 1 minute; resolution: 1 second
- Probe range (supplied) -40 to 250°C continuous or 300°C short-term; accepts all Type K thermocouples
- Supplied with flip-out stand, PVC casing, 1.2m Type K beaded probe, batteries, Traceable™ Certificate,

Cat. No	Meter Range	Resolution	Accuracy
11749765	-200 to 1,370°C (-328 to 2,498°F)	0.1° and 1°	±1°C between -50°C to 740°C, otherwise ±2°C

Traceable™ Waterproof Type K Thermometer

Rubber boot maintains waterproof integrity

- MIN/MAX key rapidly recalls highest and lowest temperature reading achieved
- Unique differential feature shows the difference in temperature from a set point
- Back-lighting key (BKLT) allows for reading in dark areas, large display is readable from 3m away
- Probe range (supplied with unit): -40 to 250°C continuous or 300°C short-term; uses all Type K thermocouples
- Supplied with carrying case, Traceable™ Certificate, battery, Type K beaded probe, cable

Cat. No	Meter Range	Resolution	Accuracy

Traceable™ Thermometers, Infrared

Traceable™ Infrared Thermometer Gun

Point-and-read gun provides temperature results of any surface in less than one second

- Easy-read display is back-lit, has low-battery indicator, and tracks maximum readings
- DATA HOLD key freezes display and gives time to accurately record readings
- Emissivity is 0.95 fixed
- Unit can take measurements in °C and °F and includes auto-off feature
- Supplied with batteries, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy	Field of view
11729785	-60 to 500°C (76 to 932°F)	0.1°	±2% of reading or ±2°C	11:1

Traceable™ Infrared Thermometer Gun

High-performance, easy-to-operate infrared gun has incredible 50:1 field of view

- Lightweight laser gun takes instant (less than a second) temperature readings of any surface
- Laser sighting beam
- Backlighting at the touch of a button
- Data hold (freezes display reading)
- Dimensions: 229mm x 102mm x 57mm
- Mass: 283.5g
- Supplied with 9V battery, low battery indicator, carrying case and Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy	Field of view
11779785	-50°C to 1,000°C (58°F to 1,832°F)	0.1° to 200, 1° over 200	±1.5% between -20°C to 200°C	50:1

Traceable™ Infrared Thermometer with Pocket Clip

Easy-to-carry design is ideal for blood bank labs

- Simple point-and-shoot operation, °C/°F switchable
- Unit reads both Celsius or Fahrenheit of any surface - solids, semisolids, and liquids
- Fixed emissivity is precisely set at 0.95
- Supplied with battery, lanyard, pocket-clip, key-chain, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy
11709785	-33 to 220°C (-27 to 428°F)	0.1°	±1°C+2%

Traceable™ Data Logging Thermometers

The Fisherbrand series of Traceable™ Temperature Data Loggers are widely used for a variety of purposes in a range of working environments such as general research laboratories, food processing, medical, agriculture and environmental. They provide an accurate and reliable record of temperature during operational processes to ensure that the best possible outputs and quality is achieved.

The majority of the Fisherbrand Traceable™ Data Loggers are armed with enough memory to store over a million temperature readings accompanied with the date and time they were recorded without any operator intervention. Accessories, which are included as standard, enable the Traceable™ Data-Logger to be placed on any wall or counter for continuous testing. If the Traceable™ Data Logger detects a reading out of the desired range, an alarm will sound and flash. Advanced Traceable™ Temperature Data Loggers also record the beginning, end, and duration of out-of-alarm ranges for even greater performance.

The Memory-Card Refrigerator/Freezer Thermometer (Cat. No 13557070 and 13587070, refer to page 31) is a new edition to the Fisherbrand series of Traceable™ Temperature Data Loggers. It is a stand-alone unit with data logging capabilities able to capture over 5.9 million readings and store them on a removable standard SD memory card. A memory card reader, which is supplied as standard, plugs into any USB computer port for an instant report which can be output as text to include date, time, and sensor readings or else sent to a spreadsheet or other database. Capturing a continuous stream of data with the Traceable range captures the behaviour of refrigerators, room areas, or very localised test conditions. Models supplied with bottle probes are ideal for use inside refrigerators, freezers, and incubators; the stainless-steel probe model is ideal for wider application especially in QC and research. Models also include internal probes to measure ambient temperature and humidity, ideal for monitoring store rooms, labs, and critical areas.

All Fisherbrand Traceable™ Data Logging Thermometers are individually certified ensuring that the thermometer has been properly calibrated to give trusted results. To guide you to choosing the right thermometer for your particular application refer to the selection guide below.

Traceable™ Excursion-Trac™ Data Logging Refrigerator/Freezer Thermometer

Data-logging thermometers with user-defined time intervals

- Meets current CDC requirements for vaccine storage and monitoring
- Rolling memory structure, maintains most recent 525,600 temperature observations
- Stores up to 10 unique alarm events
- Memory can be cleared on unit after downloading data to USB stick
- Hassle-free retrieval of data - unit can remain in use while downloading and analysing data
- Status indicators - low battery, memory full, USB data transfer and active alarm state
- Supplied with stand, Velcro™, magnets, wall mount, batteries, Traceable™ Certificate

Traceable™ Memory-Loc™ Data Logging Refrigerator/Freezer Thermometers

Data-logging thermometers that can be used in 21 CFR 11 environments

- Meets current CDC requirements and additional recommendations for vaccine storage and monitoring
- Use in 21 CFR 11 environments, raw data is locked and may not be cleared/changed on base unit
- Data Logging thermometer with fixed one minute logging interval
- Stores up to 10 unique alarm events
- Capable of storing over 1 million temperature observations
- Hassle-free retrieval of data - unit can remain in use while downloading and analysing data
- Status indicators - low battery, low memory, USB data transfer and active alarm state
- Supplied with stand, Velcro™, magnets, wall mount, batteries, Traceable™ Certificate

Traceable™ Logger-Trac™ Temperature Data Logger

Your ultimate shipping partner

- Small, compact temperature data-logger with a storage capacity of 7,680 readings
- Active LCD shows the following important data: current temperature, minimum and maximum temperatures, recording status, run time, cumulative alarm (excursion) time, quarantine status, alarm tally
- Displays cumulative alarm duration from user-selected minimum and maximum values
- Re-usable/re-programmable unit
- Integrates with MaxiThermal software for complete data analysis
- Perfect for monitoring temperature during transportation
- Supplied with battery, Traceable™ Certificate

- Temperature data logger that has a storage capacity of 64,000 readings
- Active LCD shows the following important data when recording: current temperature, minimum and maximum temperatures, recording time
- Displays cumulative alarm duration from user-selected minimum and maximum values
- When alarm condition occurs, the following additional information will be displayed on the LCD, alarm tally, alarm notification and cumulative alarm time
- Unit has an internal sensor for ambient temperature and one external probe that is perfect for monitoring cryo-material in transit as well as reagents, clinical samples, frozen samples, pharmaceuticals and food items in any location
- Re-usable/re-programmable unit with user-selectable recording intervals
- Compact size and IP66 waterproof rating
- Integrates with MaxiThermal software for complete data analysis; software features include temperature alarm set points, temperature recording interval, start delay, stop enable key

Traceable™ Memory-Card Refrigerator/Freezer Data Logging Thermometer

Temperature and humidity data logger with Min/Max memory and High/Low alarms

- User-defined temperature observations can be made once per minute up to once every 720 minutes
- Thermometer captures 5.9 million readings on removable SD card
- USB memory card reader plugs directly into Windows and Mac - no software to install
- Text report includes date/time of day and sensor readings
- Alarm sounds and LED flashes when temperature rises above or falls below user-set trip points
- Supplied with 256Mb SD memory card, memory card reader, batteries, magnetic strips, Velcro™, flip open stand, adaptor, Traceable™ Certificate

TRACEABLE™ HUMIDITY METERS AND BAROMETERS

Traceable™ Humidity Meters

For accurate results across all humidity ranges, you can rely on the comprehensive range of Fisherbrand Traceable™ Humidity Meters to read, record, manage, and even print your results without delay. These meters are perfect for determination of exact air conditions in labs, hoods, clean rooms, coolers, stockrooms, food storage, process control, incubators, environmental chambers, chemical storage areas, and inside/outside atmospheric monitoring.

Accessories, which are included as standard, allow the Traceable™ Humidity Meters to be placed securely in any location with wall mounts, bench stands, magnetic strips, or Velcro™ for continuous monitoring. Best of all, many of the Traceable™ Humidity Meters have amazing capabilities like minimum and maximum memory, alert alarms when the environment is out of range, and the ability to transfer the results directly to a laptop or PC for easy viewing and sharing.

To ensure accuracy, an individually serial-numbered Traceable™ Certificate from an ISO 17025 calibration laboratory accredited by A2LA is provided for this range of Fisherbrand Traceable™ Humidity Meters. It indicates traceability to standards provided by NIST (National Institute of Standards and Technology).

To guide you to choosing the right Traceable™ Humidity Meter for your particular application, please refer to the selection guide below.

Traceable™ Humidity Meters, Data Logger

Traceable™ Memory Card Humidity/Temperature/Dew Point Data Logger

Records readings from once a minute up to once every 720 minutes on an SD memory card

- Data Logging capabilities that can capture 5.9 million readings with 256Mb removable SD memory card
- Visual and audible alarms indicate when temperature, humidity or dew point rises above and falls below user-defined set points
- USB memory card reader plugs directly into Windows and Mac - no software to install to retrieve data/time of day and readings of sensors
- Supplied with 256Mb SD memory card, USB memory card reader, magnetic strips, Velcro™, wall mount, bench stand, batteries, adaptor, Traceable™ Certificate

Traceable™ Humidity Meters, Internal Sensors

Traceable™ Digital Humidity/Temperature Meter

Continuously and simultaneously displays RH and temperature with dual-recall memories

- Ideal for routine measurements, monitoring round-the-clock, quality control needs, and critical experimental requirements
- Minimum and maximum memories can be displayed or cleared at any time with the touch of a key
- Fulfills CLIA requirements, °C/°F switchable
- Supplied with wall mount, bench, stand, batteries, Traceable™ Certificate

Traceable™ Dew Point/Wet-Bulb/Humidity/Thermometer Alarm

Settable high/low alarms for all four readings

- Unit shows current minimum and maximum readings for dew point, wet-bulb, humidity and temperature
- Alarm sounds for 1 minute and red LED flashes until readings return to non-alarm conditions
- Supplied with stand, batteries, wall-mount, Traceable™ Certificate

Cat. No.	Range	Resolution	Accuracy

Traceable™ Thermometer/Clock/Humidity Monitor

Simultaneously displays time of day, temperature and humidity

- Features: MIN/MAX memory, memory clear, °C/°F switchable, 12/24-hour clock
- At the touch of a button, memory recalls the highest and lowest temperature and humidity readings
- Internal sensors make it ideal for use in hoods, storerooms, cleanrooms, incubators, drying chambers and environmental cabinets
- Supplied with stand, wall mount, double-back tape, batteries, Traceable™ Certificate

Traceable™ Digital Humidity/Temperature/Dew Point Meter

Convenient triple memories recall Min/Max readouts for RH, dew point, and temperature

- Audible and visual LED alarm may be set to trigger at three different humidity readings (55%, 60% or 65%)
- Solid state sensors deliver response times of less than 30 seconds, °C/°F switchable
- Supplied with wall mount, batteries, Traceable™ Certificate

Traceable™ Jumbo Humidity/Temperature Meter

Jumbo 25mm digits display humidity, temperature - read from 10m away

- Simultaneously displays ambient relative humidity and internal probe and external probe temperatures °C/°F with dual-recall memories
- Both sensor and 3m cable perform accurately when under water
- Fulfills CLIA specification 493.1207
- Response time is less than 30 seconds
- Supplied with flip-open stand, wall mount, battery, Traceable™ Certificate

Cat. No	Range	Resolution	Accuracy

Traceable™ Humidity Meters, Probe Sensors

Traceable™ Humidity/Temperature/Dew Point Meter

Resolution of 0.01% relative humidity - ideal for QC labs, ISO 9000 environments and general R&D

- Ideal for hoods, clean rooms, food storage, process control, incubators, desiccators, drug manufacturing, environmental chambers, corrosion analysis, inside/outside air monitoring
- Fulfills federal CLIA requirements
- Memory recalls minimum and maximum readings at any time, °C/°F switchable
- High and low alarms can be programmed for dew point, temperature and humidity
- Computer output permits data to be captured, transferred, stored and printed with DAS software
- Under 10 second response time
- Probe: 178mm length x 10mm diameter; cable: 1.8m
- Supplied with computer output, battery, Traceable™ Certificate

Traceable™ Remote Alarm RH and Temperature Monitor

Triple display simultaneously shows high, low, and current humidity/temperature

- Remote humidity/temperature sensor on a 2m cable
- Hi/Lo Alarms, Min/Max memories
- High/Low alarm feature may be set by user in 1% RH or 1° increments
- Perfect for use in hoods, classrooms, stockrooms, environmental chambers and chemical storage areas
- Supplied with battery, external humidity/temperature sensor, flip-open stand, wall-mount, Traceable™ Certificate

Traceable™ Memory Hygrometer/Thermometer

High-accuracy unit with broad temperature range is ideal for all lab environments

- Microprocessor-based based design provides unparalleled accuracy
- Simultaneously displays both temperature and relative humidity on dual 29mm LCD
- 1m cable allows user to retrieve readings from hard to reach areas
- Supplied with probe, cable, battery, carrying case, Traceable™ Certificate

Traceable™ Humidity Meters, Speciality

Traceable™ Printing Hygrometer/Thermometer

Printing Hygrometer/Thermometer provides permanent hard-copy results

- Provides a permanent record by printing current humidity/temperature/time/date and maximum and minimum readings; also includes the time and date that the readings occurred
- Fast response, solid-state sensors detect changes in less than 10 seconds
- Meets CLIA specification 493.1252
- Supplied with T1, T2 Type K probes, cable, cable, probe holder/stand, carrying case, paper rolls, battery, Traceable™ Certificate

Traceable™ Barometers

Barometers are ideal for recording ambient changes in the lab, monitoring conditions affecting sample analysis and assisting in the prediction of weather changes.

The Traceable™ Hygrometer/Thermometer/Barometer/Dew Point Pen (Cat. No 11745853, refer to page 36) is a versatile and lightweight unit capable of measuring humidity, temperature, barometric pressure and dew point. It features a tough ABS plastic housing and water-resistant design with O-ring seal and membrane keypad to ensure a long life in severe lab or harsh plant environments.

The Traceable™ Workstation Barometer with Clock (Cat. No 15273966 refer to page 36) measures barometric pressure and graphically displays the barometric trend. It also displays temperature with forecasting indicators showing weather conditions for the next 12-hours and time of day/date.

To ensure accuracy, an individually serial-numbered Traceable™ Certificate from an ISO 17025 calibration laboratory accredited by A2LA is provided for this range of Fisherbrand Traceable™ Humidity Meters and Barometers. It indicates traceability to standards provided by NIST (National Institute of Standards and Technology).

Traceable™ Hygrometer/Thermometer/Barometer/Dew Point Pen

Lightweight and compact unit measures humidity, temperature, barometric pressure and dew point

- User selectable dual display shows humidity/temperature, humidity/dew point, barometric pressure/temperature or barometric pressure/humidity
- Portable - easy operation
- MIN/MAX readings recalled at the press of a key
- Supplied with metal clip, battery, Traceable™ Certificate

Cat. No	Function	Range	Resolution	Accuracy

Traceable™ Workstation Barometer with Clock

Ideal weather watcher and trend setter

- Ideal for recording ambient changes in lab, monitoring conditions affecting sample analysis, and assisting in prediction of weather changes
- Unit includes a barometer, thermometer, clock, altitude adjustment, and weather symbol forecasting symbols
- Adjustable altitude compensation from -300 to 1,200 metres
- Barometric trend shows current reading, previous 1, 3, 6, and 12 hour readings in bar chart format
- Supplied with batteries, Traceable™ Certificate

TRACEABLE™ CONDUCTIVITY METERS AND PH STANDARDS

Traceable™ Conductivity Standards and pH Buffers are all designated as 'CRM', or Certified Reference Material, standards. CRM Standards are highly accurate and offer the assurance that they are the best standards on the market. All versions of these products are available in both 16 ounce bottles, as well as One-Shot packaging – which is convenient for single-use. This packaging option eliminates all concerns regarding external container contamination. Every bottle comes with a Traceable™ certificate, indicating traceability to standards provided by NIST.

Traceable™ Conductivity Standards (CRM)

Traceable™ Conductivity Standards (CRM)

Highest accuracy available assuring reliable results

- 100% compatible with all conductivity meters
- Each bottle is labelled for calibrating conductivity, resistivity and dissolved solids
- Accuracy at 25°C is the uncertainty shown on the certificate or ±0.25 microsiemens for the 5 and 10 values and 0.25% for all other values
- Supplied with 16 ounce container, step-by-step calibration instructions, individual temperature compensation charts, traceability information, Traceable™ Certificate

11744226

Traceable™ One-Shot™ Conductivity Standards (CRM)

Calibration within disposable container eliminates contamination

- Traceable™ One-Shot™ Conductivity Standards (CRM)
- Calibration within disposable container eliminates contamination
- Certified Reference Material
- 100% compatible with all conductivity meters
- Accuracy: certificate stated uncertainty, or ±0.25 microsiemen or ±0.25%
- Supplied with six pack 100mL container, step-by-step calibration instructions, individual temperature compensation charts, traceability information, Traceable™ Certificate

Traceable™ pH Buffer Standards (CRM)

The most accurate pH Standards available anywhere

- 100% compatible with all pH instruments and electrodes
- Accuracy at 25°C is ±0.010 pH
- Select values manufactured to IUPAC (International Union of Pure and Applied Chemistry) formulation—features long term buffer stability and buffer resistance to temperature changes during pH meter calibration
- Triple layered proprietary packaging - aluminum foil, PET and low density polyethylene bag - prevents contamination by permeable gases and provides two year shelf life
- Each 16 ounce bottle or six pack single-use 100mL container is supplied with an individual temperature compensation chart, traceability information, Traceable™ Certificate

Traceable™ Expanded Range Conductivity Meter

Accurate answers in five seconds

- Ideal for checking water purity in stills, deionisers, reverse osmosis; testing glassware rinsing, measuring total dissolved solids, and making solutions
- Meter automatically selects proper range and displays the exact answer
- Compatible with all accreditation analysis requirements—perfect for labs wanting to maintain accreditation
- Unit fulfils requirements for CAP, ASTM, NCCLS, CLSI, ACS, CLIA, ADAC, EPA, APHA, AWWA, WEF, USGS, USP, ISO, and Federal/State regulations
- Supplied with probe, batteries, carrying case, computer output, Traceable™ Certificate

Traceable™ Conductivity/TDS/Salinity Pens

Traceable™ Conductivity/TDS/Salinity Pens

Easiest unit ever designed for routine analysis and quality control

- Three units provide for conductivity, conductivity/total dissolved solids, and salinity
- Simply turn on, insert, and simultaneously read results and temperature eliminates operator technique errors
- Constructed for severe lab or harsh plant environment use
- Arrow key allows fast setting to calibration standards that are maintained even when unit is off
- Pens fulfil requirements for CAP, ASTM, NCCLS, CLSI, ACS, CLIA, ADAC, EPA, APHA, AWWA, WEF, USGS, USP, ISO, and Federal/State regulations
- Supplied with Traceable™ Certificate, battery

Traceable™ Conductivity Meters

Traceable™ Bench Conductivity Meter

Easy-to-use—simply turn on, insert probe and read results

- Fulfil all official lab analysis regulations for CAP, ASTM, NCCLS, CLSI, ACS, CLIA, ADAC, EPA, APHA, AWWA, WEF, USGS, USP, ISO, and Federal/State regulations
- Unit automatically encompasses all ranges and selects the most appropriate for the current reading
- Control allows user to store four calibration points using solution standards
- Supplied with adapter, probe replanting current, probe holder arm, battery, Traceable™ Certificate

TRACEABLE™ LAB TOOLS

Fisherbrand range of Traceable™ Lab Tools includes Traceable™ Digital Calipers, Traceable™ SpatulaBalance™ and Traceable™ Manometer/Pressure/Vacuum Gauges. As with all the Fisherbrand Traceable™ products these three products are supplied with a Traceable™ Certificate indicating traceability to standards provided by NIST.

Further lab tools are featured within the 'Fisherbrand Supplement' Section (refer to pages 46 to 73) and include useful products such as: Counter-Pen and tally counters, which are ideal for counting cells and samples; Desi-Vac™ Vacuum Pump Containers used for storing chemicals, powders, sample tissues and plant section; Labtool II™ a stainless steel, pocket size lab tool featuring fourteen tools in one; permanent markers pens which write on all surfaces including glass, film, wood, plastic, metal, rubber and porcelain.

Traceable™ Digital Calipers

Ideal for measuring inside diameter, outside diameter and depth

- Designed for laboratory use, measures in inches and millimeters
- Zero button instantly sets unit to zero when jaws are at any position—permits, without calculations, setting a Floating Zero™ or reference point to read 'greater than or less than results with a minus sign displayed'
- No lubrication is ever required on the ultra smooth slide bar, runs on the supplied battery for 10,000 hours
- Supplied with carrying case, battery, Traceable™ Certificate

Traceable™ SpatulaBalance™

Unique spatula both scoops material and displays weight

- Three position soft touch keys in the handle tares (sets to zero), holds (freezes display) and changes grams to ounces
- Scoop detaches from balance for dishwasher safe cleaning
- LCD indicates low battery
- Markings on see-through scoop that comes as standard with the SpatulaBalance™ (Cat.No 15388764) are graduated from 5 to 30mL in 5mL increments for weighing liquids with ease
- Markings on see-through larger volume scoop (Cat. No 15398764) are graduated at 20 and 40mL
- Supplied with batteries, detachable scoop, Traceable™ Certificate

Traceable™ Manometer/Pressure/Vacuum Gauges

Quick response manometer with memory key allows for recalling highest and lowest readings

- Portable unit measures and displays differential pressure/vacuum in eleven different units: psi, mbar, bar, cm/H₂O, inch/H₂O, mm/Hg, mm/Hg, inch/Hg, kg/cm², oz/inch², kPa
- At the touch of a key, unit may be zeroed or any pressure may be set to zero
- Hose fittings on the unit permit hose/tubing with inside diameters from 1.6mm to 4.8mm
- Memory feature recalls highest and lowest readings over any time period
- A DATA HOLD key freezes the display to capture readings
- Count-up timer displays up to 99 hours, 59 minutes, 59 seconds
- Accuracy is ±0.3% of full scale between 0 and 50°C
- Dimensions (l x w x h) and weight are 70mm x 28.6mm x 181mm and 142g
- Supplied with computer output, hose/tubing, batteries carrying case, Traceable™ Certificate

TECHNICAL RESOURCES

Here to give you a helping hand!

Fisher Scientific's Product Support Team is your dedicated information resource. Our Product Support Advisors are all highly qualified professionals who are here to support and guide you to the fastest, most effective and efficient answer to your enquiry.

Areas of technical expertise include:

- Bioreagents and Life Science
- Chemicals and Chromatography
- Consumables
- Equipment
- Safety

This section lists some of the most frequently asked questions about electrochemistry and pH measurement as received by our Specialists, together with the answers they provided. If you are unable to find the answer to your question, are stuck and need help or are simply confused and unsure of which product best suits your research needs, the Product Support Team are here and ready to respond to your enquiries.

FAQ's – Traceable™ Products

Q. What is Traceable™ ?

A. In the context of measurement science, traceability that the result of a measurement can be traced back to a national authority such as the National Institute of Standards and Technology (NIST), a United States Government Agency within the Commerce Department. Specifically there exist a known valid relationship to international or nationally recognised standards and a thoroughly documented unbroken chain of reference to the measurement authority. The ISO 17025 calibration certificate that comes as standard with the units is recognised in all European countries.

Q. Why should I purchase Traceable™ products?

A. Each Traceable™ unit is individually serialised, calibrated and certified. An individually serialised Traceable™ Calibration Certificate provides assurance that an independent auditor has checked the methods, procedures, testing, technique, and record-keeping practices of the calibration testing laboratory. The American Association for Laboratory Accreditation (A2LA) is widely recognised internationally through bilateral and multilateral agreements and through its participation in International Laboratory Accreditation (ILAC) and Multilateral Recognition Agreement (MRA). There is no need to have the units calibrated locally before use as all European governing bodies fully accept and recognise the Traceable™ certificate of calibration.

Q. How long are the Traceable™ calibration certificates valid for?

A. Units are calibrated for two years from date of manufacture. Generally, following shipping and stocking of the units, we would advise that you should expect a minimum of one year.

Q. What does accuracy mean?

A. Accuracy is a definition of how accurate the instrument is compared with a known temperature. Since it is very unlikely that anything will be exactly accurate, it is usually accompanied by a reference to a tolerance. The tolerance indicates the value of inaccuracy that is inherent in the instrument. For example, an instrument that has an accuracy rating of $\pm 1^{\circ}\text{C}$ means that the unit's display can show up to 1°C higher or 1°C lower than the actual temperature that is being measured and still be within the stated tolerance and accuracy of the unit.

Q. What does resolution mean?

A. The resolution of an instrument is the smallest value that is shown on the display. Thus an instrument that has a 0.1°C resolution means that it will read to the nearest 0.1°C (perhaps 8.6°C) on the display, whereas an instrument with a 1°C resolution will only read to the nearest 1°C (9°C).

Q. If I replace the battery on my Traceable™ Timer do I need to recalibrate it?

A. None of the Fisherbrand Traceable™ products need to be recalibrated or recertified due to a battery change. These units are traceable back to NIST standards and the ISO 17025 calibration certificate that comes as standard with the units is recognised in all European countries.

Q. Can you replace the scoop on the Traceable™ SpatulaBalance™?

A. Yes replacement scoops are available, Fisher Scientific Cat. No. 15388764. This is the standard replacement scoop, 30mL. There is also a larger replacement scoop available which is 40mL, Fisher Scientific Cat. No 15398764.

Q. When it states 'shows MIN/MAX' when referring to thermometers, what does this mean? Also, what does HI/LO and IN/OUT mean?

A. Min/Max are the temperature readings at the lowest range (minimum) achieved and the highest range (maximum) reached since the thermometer's memory was last cleared; the Min/Max is NOT a settable feature. On several units, you can program HI and LO alarms so that if the temperature of what you are measuring goes outside of your pre-set values, the unit will alarm. Several thermometers also feature IN/OUT readings. The IN and OUT temperatures refer to different sensors, the IN is the internal sensor located inside the unit and the external probe is referred to as OUT.

Q. What is the function of the bottle/vaccine thermometer probe?

A. Bottle probes are useful for use in refrigerators where the door is likely to be opened on a regular basis. The probe sealed within the bottle gives an indication of the temperature of the product within the refrigerator itself rather than the air temperature, which would be affected quite quickly by the door being opened. The vaccine probe uses a similar concept, but is of similar dimensions to most vaccine bottles. This helps to give an accurate determination of the temperature of the vaccine being stored.

Q. Bottle sealed probes are used with a number of Traceable™ thermometers. What are these bottles filled with?

A. Bottle probes are filled with non-toxic glycol solution, which is GRAS (generally recognised as safe) by the US FDA.

Q. My application requires high accuracy, which product should I go for?

A. The various 'Ultra' products in the Traceable™ range are calibrated with an accuracy of 0.4°C at tested calibration points. 'Extreme accuracy' units are also available. These are calibrated with an accuracy of ± 0.05 within 2°C of tested points. These are available for the commonly tested points of 0°C , 25°C and 37°C . Additionally, the Platinum High-Accuracy thermometers have an accuracy of $\pm 0.1^{\circ}\text{C}$ across the entire temperature range.

Q. My thermometer is giving erratic readings, what could be going wrong?

A. Erratic readings, a faint display, or no display are all indicators that the batteries must be replaced. In most cases, simply changing the battery will allow the unit to begin functioning normally.

Q. I have two units that are showing different temperatures. Is there something wrong with my units?

A. When comparing two thermometers, you must add the tolerances of the two units together to identify the total amount of variance that can be found within the two units and still be considered within specification. For example, when comparing two of the same unit that have a $\pm 0.1^{\circ}\text{C}$ accuracy, the two units can display temperatures that are up to 2°C different. When comparing temperatures of difference thermometers it is important that the type of probes that you are comparing are equivalent.

FISHER CHEMICAL AND FISHER BIOREAGENTS

In addition to the range of Fisherbrand Traceable™ Products featured in the first section of this brochure (pages 8 to 43), Fisher Scientific is also your partner of choice for chemicals and bioreagents. Fisher Chemical and Fisher Bioreagents deliver convenience, quality and consistency and are the leading provider of chemicals and bioreagents to many research sectors such as academia, pharmaceuticals, biotechnology and healthcare.

The two selection guides below provide an overview of the main solvents and various water products used in every day laboratory research.

FOCUS ON FISHER CHEMICAL AND FISHER BIOREAGENTS

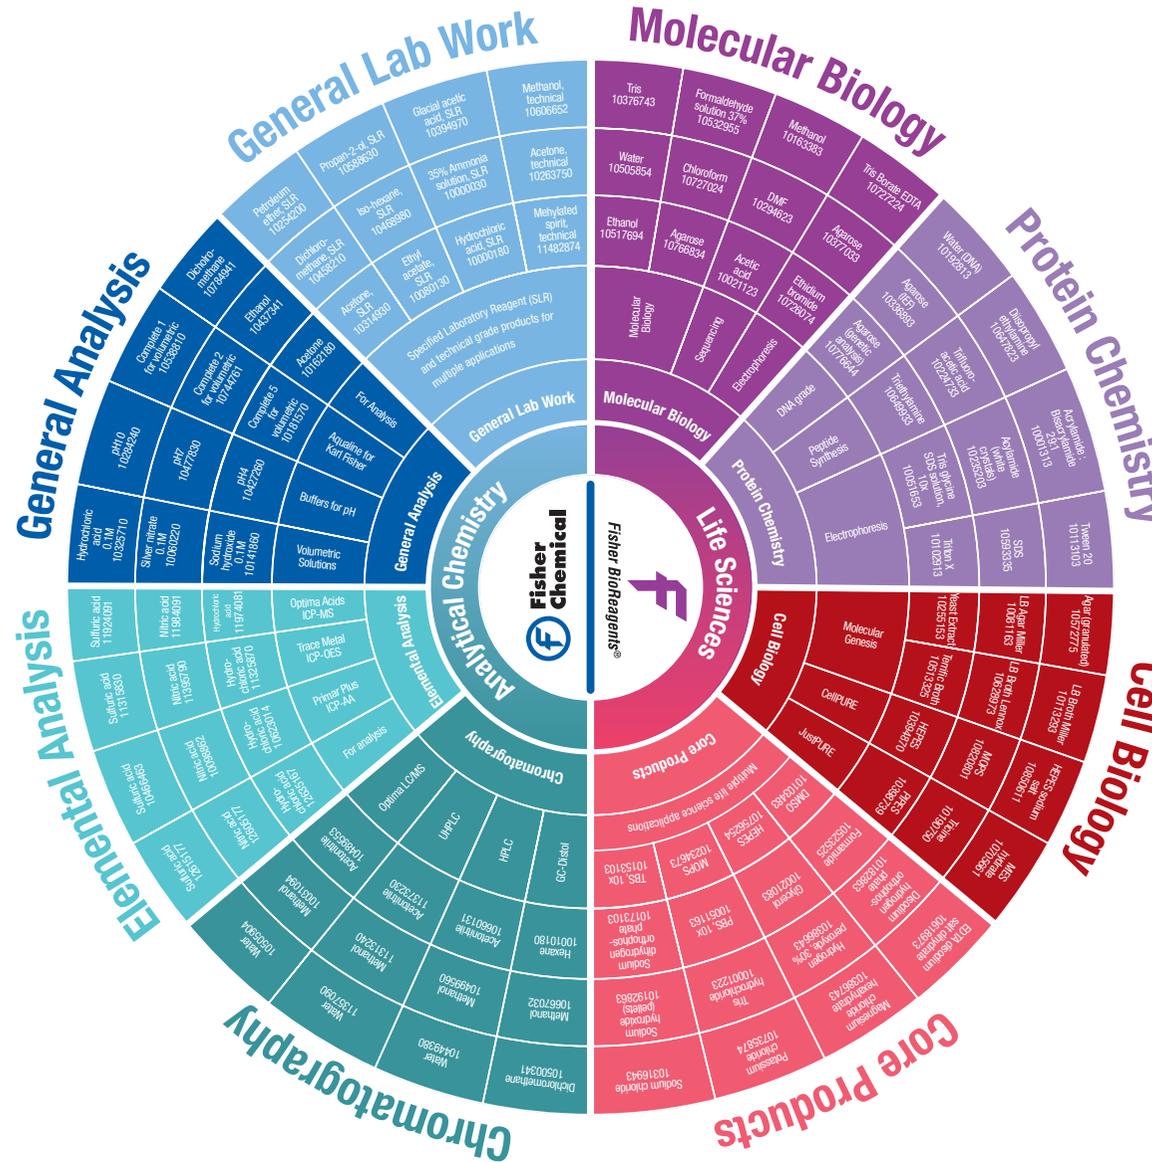

Depend of Fisher Chemical and Fisher Bioreagents to provide products that meet your every day analytical and life sciences needs.

Fisher Chemical offers more than 4,000 products dedicated to four main analytical applications:

- Chromatography
- Elemental Analysis
- General Analysis
- General Lab Work

Within each application area the main chemical grades are featured along with the most popular product and pack size. For further information on the complete ranges available visit www.eu.fishersci.com

Fisher Bioreagents®

Fisher Bioreagents offer over 1,000 products dedicated to four key application areas:

- Molecular Biology
- Protein Chemistry
- Cell Biology
- Core Bioreagents

Within each application area the main techniques/ grades are featured along with the most popular bioreagent and pack size. For further information on the complete ranges available visit www.eu.fishersci.com

This section features additional Fisherbrand products to supplement your everyday laboratory needs. Whilst these products are not part of the Traceable™ range, they continue to demonstrate that Fisherbrand is committed to delivering you the broadest selection of quality, affordable and innovative products.

EQUIPMENT

Bag sealer with cutter

- Seals polyethylene or polypropylene bags, sheets or flat tubing 0.01mm to 0.8mm thick
- Timing knob ensures safe sealing, heating element only hot when sealing
- Sliding blade removes excess material
- Includes extra blades, heating elements, PTFE cloths

Balances, Compact series

Rugged housing design provides best overall overload protection and durability in its class. Uniquely designed for a wide variety of applications, these balances feature easy operation, long battery life and great performance.

- Sleek, low profile design
- Large, high contrast LCD
- Energy saving auto shut-off feature
- Two button keypad
- Storage made easy with a stackable design
- Integrated load cell lock
- Over-load and under-load indicators
- Digital calibration from keypad
- Low battery indicator
- Three AA batteries (included) or optional a.c. adapter
- Two year warranty

Balances, Portable series

Fisher Scientific's best selling portable balance, featuring easy to use two button operation, high contrast LCD display, multiple weighing units and the option of either RS232 or USB connectivity.

- Excellent shock resistance and overload protection
- 50 hour battery life with auto shut-off
- Shipping and calibration locks
- Integral weigh-below hook, critical for density or specific gravity determination
- Optional RS232 or USB snap-in module allows data connection to PC or printer
- Two year warranty
- Large, high contrast LCD
- Two button operation
- a.c. adapter (included) or requires four AA batteries (not included)

Balances, Analytical series

The easy to clean draft shield, upfront level indicator and selectable environmental settings make the Fisherbrand range of analytical balances ideally suited to meet the routine weighing needs of most labs.

- Weighing modes include weighing, parts counting and percentage weighing
- Large draft shield with sliding top and side doors
- Single line LCD
- Three button operation
- RS232 bi-directional interface
- Front level indicator - no need to look in back of balance during levelling process
- Solid diecast metal base, stainless steel pan
- Works well in harsh environments; settings can be adjusted to compensate for vibrations and other disturbances
- Calibration lockout
- Integral menu lock - a combination of software and a mechanical switch locks menus, including calibration
- Security loop in rear of balance
- a.c. adapter (included), balance power input 8 to 14.5V a.c., 50/60Hz 4VA or 8 to 20V d.c., 4W
- Two year warranty

Balances, Moisture series

The Fisherbrand Moisture Analyser features high quality durable construction and easy one button set up. With a large backlit LCD display, standard RS232 port, 60g capacity with a readability of 0.005g/0.05% and halogen heating, it is ideal for food analysis, quality control, waste water analysis, and an endless number of industrial, environmental and life science applications.

- Large backlit LCD display
- RS232 bi-directional interface
- Easy to clean heating chambers ideal for frequent use and inexpensive maintenance
- Compact footprint designed to take up less space
- Heating technology: Halogen (50°C to 160°C in 5° increments)
- Repeatability (Std. Dev., g): 0.2% (3g sample) 0.05% (10g sample)
- 200V a.c. to 240V a.c., 3A, 50/60Hz
- Two year warranty

Sonic dismembrator

NEW

- Four models available:
 - Model 50 Sonic Dismembrator: Processes 0.2 to 50mL, 50 watts, continuous or remote operation, (footswitch optional) lightweight converter (340g) for hand-held operation
 - Model 120 Sonic Dismembrator: Processes 0.2 to 50mL, 120 watts, programmable from 1 second to 10 hours, overload protection, pulse mode (1 to 59 seconds), energy display (watts and Joules), lightweight converter (340g) for hand-held operation
 - Model 505 Sonic Dismembrator: Processes 0.5 to 500mL, 500 watts, programmable from 1 second to 10 hours, overload protection, pulse mode (1 to 59 seconds), energy display (watts and Joules)
 - Model 705 Sonic Dismembrator: Processes 0.2 to 1,000mL, 700 watts, touch screen display, programmable from 1 second to 99 hours, save up to 10 different programs, overload protection, pulse mode (1 second to 24 hours), energy display (real-time watts and cumulative Joules), temperature monitoring (requires, optional temperature probe), full amplitude control from 1 to 100%
- Applications include:
 - Cell disruption
 - Homogenisation
 - ChIP/DNA shearing
 - Nanoparticle dispersion
 - Protein extraction
 - Sonochemistry
 - Soil extraction
 - Mixing

Stirrer, ultra thin, magnetic

- Modern magnetic coil technology
- Ultra thin design - just 12mm high
- Variable speed setting from 15 to 1,500rpm
- Anti-skid pads
- Set-up plate and casing made from chemically resistant materials
- Stir bar docking location to place or attach magnetic stir bar
- Power supply - supplied with UK and EU adapter
- Pulse function provides better mixing (stir bar alternates rotating clockwise and counter clockwise every 30s)
- Flat surface
- Simple control panel with easy to use interface
- Speed indicator during operation
- Wearfree drive (no moving parts). Maintenance free
